

Biolift 400

Biolift 400

Blood donation table for Biomixer. A new concept to simplify the blood donation procedure by lowering the mixer during donation and raising it when the process has been completed. Biolift 400 can be programmed to the desired level in both upper and lower position. It has a fixed upper tray for small items and a lower fixed tray for heavier equipment. The unit is equipped with wheels and therefore easy to move. As an option Biolift 400 can be delivered with foot switch.

Technical data:
